EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

STI West Negros University
2022 - 2026

PROFILE

Results-driven Web Developer with production-level experience building full-stack platforms. Architected and deployed centralized regulatory systems for DHSUD NIR. Seeking to leverage expertise in secure web apps, data migration, and modern frameworks in a professional tech environment.

EXPERIENCE

INTERNSHIP

DHSUD NIR Software Engineer (2026)

- HOA Registry System (HOACDD): Built a secure, full-stack digital registry (Vue 3, Django) with automated Python Pandas data migration for legacy Excel/CSV records.
- ELUPDD Dashboard: Developed a web-based tracking system featuring interactive geospatial Choropleth maps and an integrated AI chatbot to monitor LGU compliance.

PROJECTS

- Bacolod Flood Map: Real-time monitoring web app (React, Node.js) integrating Open-Meteo API for dynamic vulnerability alerts.
- Sentinels: 2D educational cybersecurity RPG featuring a multi-role admin dashboard (Python, Django, React).
- POS Analytics: Integrated system analysis tool providing comprehensive reporting for business operations (Python, Django, PostgreSQL).
- MorphRift: 2D puzzle game featuring unique size-morphing mechanics (Unity, C#).
